No Sew Fringed Scarf

Materials

- 50" to 60" (inches) thick non fraying fabric. Fleece, Felt etc.
- 20' to 30' (feet) Thick yarn, faux fur, fabric strips.
- Cutting board with 1/2" measurements
- Rotary cutter or fabric scissors
- Quilting ruler (clear)
- Crochet hook (optional)

Instructions

- Lay your fleece on the cutting mat, measure the length and width of your scarf. Cut the fleece with the rotary cutter. Make as long or short as you'd like.

- **FOR YARN** - Fold the ends about 1/2" and make tiny snips on the fold, about 1/4" apart.
- **FOR CHENILLE OR FAUX FUR** - Fold the ends about 1" and make tiny snips on the fold, about 1/2" apart.

- Cut the yarn/fur the desired length. Take one or 2 strands depending on thickness, and fold them in half, then pull through the little snips you made on the scarf. A crochet hook can be helpful here.

- Take the ends and pull through the little loop you just created with the yarn. *Gently* pull until the strands form a tight knot, so you won't tear the fleece at the holes you cut.

- Trim to the desired length and you're done.

For a quicker fringe, just cut up 2 or 3 inches from the edge!
